

## Chemicals Business of Uflex Certified with ISO 45001:2018

**Noida, April 11, 2019:** Upon completion of an extensive Occupational Health and Safety Evaluation, Chemicals Business of Uflex Limited a leading supplier of Inks, Adhesives and Speciality Coatings, successfully migrates to ISO 45001:2018. ISO 45001 is structurally an integration of other ISO Management Systems standards including ISO 9001:2015 and ISO 14001:2015 attained by the business earlier.

Chemicals Business of Uflex was already in certified with BS OHSAS 18001:2007 certification and has now migrated to ISO 45001:2018. This certification further illustrates the commitment of Chemicals Business to continual growth, improving the health and safety of its employees, reducing occupational hazards and ensuring the best Quality Work Life.

The assessment of the Risk Management ISO 45001:2018 was carried out by DNV-GL. ISO 45001 is a new international standard for the occupational health and safety (OH&S) of companies' management systems. The standard has more detailed clauses lining out its expectations of employee involvement, documentation of results and program effectiveness, risk evaluation and considering how safety impacts all stake holders including employees, contractors, outsourced operations, vendors, etc.

This standard also provides the specification for formal, systematic analysis and management of risk, management of regulatory compliance, promotion of safe work practices, and evaluation of occupational health and safety performance. A systematic approach facilitates a reduction in the number of incidents and eventually fewer disruptions to business.

**On the certification, Rajesh Bhasin, Jt. President, Chemicals Business at Uflex Ltd. commented,** "It is our prime responsibility to continuously improve health and safety standards in our plants and workplaces that allows our employees to stay healthy, safe and productive. ISO 45001:2018 will help our business to achieve the intended outcomes of its OH&S management."
